

AVS Ventvisors™ – Worldwide Leader with over 1500 Applications

AVS history dates back to 1935 as the innovator of the original ventvisor and the product category. Our signature product innovation is precision engineered for an exacting fit to the broadest range of vehicle applications on the market today. Its unique design allows fresh air to naturally circulate through open windows while keeping the rain out, circulating stale air as well as allowing drivers to keep their window cracked while parked, keeping the interior cooler in extreme heat.

AVS offers drivers of trucks, SUVs, CUVs, vans and passenger cars a variety of style choices to suit their preferences and vehicles. Primary products include:

THE STANDARD VENTVISOR™

The ventvisor is precision engineered for an exacting fit to the broadest range of vehicles on the market today. The Standard Ventvisors customized design mounts in minutes to the outside of the vehicle using pre-applied 3 M adhesive mounting tape; no drilling or special hardware required.

Higher profile, outside mount

IN-CHANNEL VENTVISOR™

AVS In-Channel Ventvisors, custom made for an exacting fit to over 200 vehicle applications, are aerodynamically designed to blend beautifully with each vehicle. This design easily secures into the window channel or along the rubber seal with pre-applied 3M automotive tape. No drilling or special hardware required.

Low profile, inside channel mount

LOW PROFILE VENTVISOR™

AVS the lowest profile ventvisor on the market today providing a sophisticated OE-installed look to the vehicle while offering great functionality. The product mounts in minutes to the outside of the vehicle using pre-applied 3M adhesive mounting tape; no drilling or special hardware required.

Lowest profile, outside mount
